If You Visit Our Gardens During The Blooming Season, And We Hope That You Will, Kindly Bring This Catalog With You When You Come.

Greetings

We wish to take this opportunity to thank all of our many customers for their fine orders during the past years. We hope that the confidence you have placed in us has been well repaid with blooming results from our stock fulfilling your expectations to the fullest. Our interest does not end with the completion of a sale—we want to feel that we have not only furthered your interest in the growing of fine Iris but have made a lasting friend of a customer.

In this year's catalog we have listed thirty-five varieties which are offered for sale by us for the first time. Many of these are new introductions of the 1951 season, some several years older but all are what we consider worthwhile additions to our modern and complete collection of Bearded Iris. We have eliminated quite a few varieties because they have been excelled by newer and superior varieties in the same color class and in the same price range.

BLOOMING SEASON — THE TIME TO VISIT US

Pictures and descriptions of Iris are a poor substitute for the actual viewing of the Iris while it is in full bloom—only then can its charm and beauty be appreciated to the fullest extent. So by all means pay us a visit during the blooming season if you are within driving distance. You are most welcome at all times—mornings (earlier the better) is the ideal time to see them at their best. The normal blooming season for this locality is usually mid-May until mid-June with the peak bloom from May 25 to June 5th. If in doubt as to the best time, suggest that you telephone us before coming—Tel. Springtown 2591.

LOCATION

Our gardens are located one half mile west of Route 212; watch for turn at the north end of the Village of Pleasant Valley. Our sign posts will guide you when nearing Pleasant Valley from any direction.

SHIPMENTS

Bearded Iris may be planted anytime from early July until mid October. We will commence filling orders this year on July 7th and continue until October 10th. The later you get them, the larger the rhizomes. Cultural directions sent with all orders.

OUR NEW IRIS

Introductions for 1952

This year Professor John Dolman, Jr. of the University of Pennsylvania and Swarthmore, Pa. has given us permission to introduce two new Iris which we had on test display last season. Both gave a most satisfactory performance and were highly regarded by all who saw them in bloom here, as well as in other prominent Iris growers' gardens in New England. Other varieties originated recently by this well known Iris hybridizer are Black Ruby, Bisque and Kathy Dee. His new ones are:

SPANISH CREAM

A tall, robust, two-toned light yellow, suggesting the confection that Mother used to make. The flowers are ruffled, of very firm substance and great resistance to wind and rain; they are well placed on strong widely branched stalks that do not go down in warm weather. Voted an award of Highly Commended by the judges of the A.I.S. in 1951 (the only official award an Iris can receive in the garden before introduction). Blooms late mid-season—40". Stock limited. \$10.00 each

JILL

A perky little blue Iris of great charm. The flowers are ruffled and very flaring, and particularly well placed in the established clump, giving a very lively garden effect. Stands wind and rain exceptionally well. A strong grower and rapid increaser. Blooms early mid-season. 32". Stock limited. \$5.00 each

A NEW IRIS HYBRIDIZER MAKES HER DEBUT

Mrs. R. Moore Price of New Hope, Pa., a successful painter who for many years exhibited and sold her work in New York and Philadelphia, has in recent years devoted much of her time to the breeding of Bearded Iris. She has obtained several worthwhile seedlings in the pinks and browns. After twelve years of effort she accomplished her objective of producing a superior pink Iris. We have honor and pleasure of introducing this new Iris which we feel will make a worthy addition to the best of collections:

CONCHELL PINK

A lovely pink Iris in the new shell or light warm pink tone, suggesting the colors of the conch shell. The large flowers are self colored except for a slight flash of ivory accenting the deep orange of the beard. The branching is well spaced on a sturdy stalk of three feet or more. Due to its late flower habit, it is very complimentary with delphiniums or other early perennials. \$7.50 each

The excerpt printed below appeared in an article by John Dolman, Jr., the well known iris breeder and writer, in the October, 1951 issue of the Quarterly Bulletin of the American Iris Society. The article was a report of his visits to iris gardens in New England, with several stops enroute. We quote in part:

Leaving Swarthmore early on June 1st, I found myself at 6:30 A.M. in the display gardens of Oliver Holton's Cherry Hill Farm at Pleasant Valley, near Quakertown. At 6:32 he invited me in for coffee and toast. Mr. Holton is a Bethlehem businessman who grows and sells iris as a sideline, and is still a hobbyist at heart. He is the only iris dealer, at present in Region #3—the only one at least whose catalog I have seen. He makes coffee as well as he grows iris, and that is saying a great deal, for I have never seen more vigorous growth or rapid increase on bearded iris anywhere. He and Mrs. Holton have a charmingly remodeled farm-house, a well landscaped garden, and a beautiful view. After an hour and a half of keen

OUR DISPLAY GARDENS

enjoyment among fine irises, in perfect weather, and at the very best time of the day, I headed for Suffern, New York.

In the same issue of the Bulletin, Mrs. Wallace J. White, iris grower and judge from Altoona, Pa., writes:

From Clifton Heights we journeyed to the Cherry Hill Iris Gardens at Pleasant Valley, Pa. Here, Mr. Holton, the owner, has transformed a ramshackle house into a thing of beauty, and the farm into a gorgeous iris garden. Some of the newer varieties were Melody Lane, Pink Sensation, Pink Formal, Pinnacle, Argus Pheasant and Spanish Peaks, all in a perfectly beautiful setting and so well grown. Of course he had plenty of the older varieties arranged so that the visitor and prospective buyer could pick and choose to his heart's content. There was a constant stream of people coming and going all the time, which proved the popularity of both Mr. Holton and his lovely garden.

VATICAN PURPLE (Whiting, 1943) M.L. 36"

A rich glossy blue-purple self with a satin like finish. Heavily textured flowers and a reliable grower. 53rd on Best 100 List. \$1.50 each

WABASH (Williamson, 1936) M. 38"

Pure white standards and rich velvety purple falls with a white border. Most striking and outstanding as evident from the fact it was voted the No. 1 Iris by over one hundred Iris judges in 1940, 1941 and 1942 and has been well up on the best hundred list ever since its introduction. IRIS FOR EVERY GARDEN

By Sydney B. Mitchell

The most up-to-date and complete book on Iris ever written with all basic information for amateurs and for specialists, an authentic discussion of species and varieties all over the world. With this book as guide you can select Irises to bloom from 3 to 12 months a year depending on where you live and what you plant—the familiar bearded, the Japanese, Siberian, Louisiana types, or certain rare and fascinating species. Dr. Mitchell has grown Iris for 50 years, has himself developed new varieties, and shows you the way to special satisfaction with this “finest hardy perennial.”

25 species and varieties in full color
Twelve pages of plans and drawings—\$3.00

PERMARK'S

PERmanent MARKers For Plants

PERMARKERS, the new garden marker, meets all the exacting labeling requirements of discriminating gardeners and growers. They were designed after years of research and after testing all ordinary labels now on the market.

The label is made of dark green translucent Vinylite, most durable of all plastics. This label is most inconspicuous in the garden except for the yellow writing. A special Prismacolor orange-yellow pencil is used—it takes a fine point and does not smudge. Writing remains legible for years but can be easily erased for re-use.

The supports are made of Bethanised steel which is light, rigid, durable and non-corrosive. They will not turn or heave and hold the labels firmly at a readable angle. Labels easily removed from supports. Labels and supports complete priced as follows

Ten — \$1.40	Twenty-five — \$3.25
One hundred (pencil free) — \$12.25

A Customer in Maryland Writes:

The Iris which I ordered from you last June came to-day and I want to tell you as well as others that they were the finest roots I have ever received from any place. It so happened that today was my birthday which of course made me doubly happy. I hope to send you another order next year.

Yours truly,
Cecilia M. Raines

Letters like the above make us very happy too, and we appreciate greatly the many kind letters we receive from customers who take the time and trouble in this busy world to sit down and tell us how pleased they were with our stock. We aim to please every customer and if we ever cease to do that, we will stop growing iris commercially and grow a few for our own pleasure only.

THE IRIS HALL OF FAME

The American Iris Society recently established "The Iris Hall of Fame." Iris may attain this high honor only by being voted the favorite Iris of the year or by being one of the Hundred favorites over a period of ten years. Being older Iris, they are not expensive and so are a splendid group for beginners in Iris to acquire as a start.

As a Symposium Leader (Best Hundred List).

Wabash for years of 1940, '41 and '42.

Great Lakes for the years of 1943, '44, '45 and '46.

Ola Kala for the years of 1947, '48 and '49.

Chivalry for the year of 1950.

As a Ten Year Symposium Favorite.

EVERY GARDEN SHOULD HAVE SOME IRIS PLANTINGS

No other flower gives such large returns for so little investment in time and money.

Iris are easy to grow, hardy and practically free from disease and most insect pests.

The range in color is more extensive than in any other flower and with the various blends, by-colors, plicates and variegatas, the variety to choose from is almost unlimited.

Iris not only give wonderful color value and added beauty to your garden, but are excellent as cut flowers for the house. A stalk, if cut when the top flower is opening, will last a week or longer.

IRIS AS A GIFT

If you have a friend, relative or good business customer interested in flower gardening, you would make them very happy by sending one of our numerous special Iris Collections as a gift. Donor's card will be enclosed with the shipment—either one you send (no writing however except your signature on account of postal regulations) or one supplied by us showing your name. Each year more and more of these growing and lasting gifts are ordered by our customers. If a special date of delivery is desired, it is necessary to order at least two weeks in advance.

BEFORE SENDING IN YOUR ORDER PLEASE BE
SURE TO READ PAGE 2 UNDER SPECIAL DIS-
COUNTS AND ALSO FREE IRIS FOR
